RABBI'S WARNING ON RADICALISATION

A senior European rabbi has said the power given to people on the fringes of society by social media companies was "causing chaos". Chief Rabbi Pinchas Goldschmidt, president of the Conference of European Rabbis (CER), was speaking at a debate about social media companies and radicalisation at the Munich Security Conference. He said the attack on a synagogue in Halle, Germany, last October was "digitally inspired," as was the attack on two New Zealand mosques.
